PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building AI/ML applications, LLM-powered systems, automation workflows, and backend services. Proficient in Python, machine learning workflows, REST APIs, SQL, and data processing, with practical experience using HuggingFace Transformers, Ollama, Scikit-learn, PostgreSQL, Docker, n8n, and AWS EC2. Experienced in integrating ML models and LLMs into real applications, evaluating model outputs, building automation pipelines, and deploying containerized services in Linux environments. Interested in AI/ML engineering, AI agents, data science, and cloud-based automation.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

AI / ML: Scikit-learn, HuggingFace Transformers, Ollama, LLM APIs, Prompt Engineering, Model Evaluation

Data Science: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Preprocessing, Data Analysis

Visualization: Matplotlib, Seaborn

Backend / APIs: Django REST Framework, Flask, Node.js, Express.js, REST APIs

Databases: PostgreSQL, SQLite, SQL querying and data manipulation

Automation / AI Agents: n8n, OpenClaw, Workflow Automation, AI Agent Workflows

Cloud / DevOps: Docker, Docker Compose, AWS EC2, Linux, Git, Terraform (learning), Kubernetes (learning)

Frontend: React, Flutter

PROJECTS & EXPERIENCE

Vinayaka – Enterprise AI Chatbot & LLM Pipeline

2025–2026

- Designed and developed an AI-powered enterprise chatbot using Python, integrating multiple LLM backends including HuggingFace Transformers and Ollama.
- Implemented prompt engineering, model selection, response evaluation, and iterative improvement by analyzing failure cases and edge-case inputs.
- Built Python-based validation and filtering logic to identify unreliable or unsafe model responses and improve response quality.
- Compared outputs from multiple LLM configurations to evaluate consistency, relevance, and response quality for model-selection decisions.
- Integrated PostgreSQL for structured data storage, retrieval, chatbot context, and application logging.
- Technologies: Python, HuggingFace Transformers, Ollama, PostgreSQL, SQL*

AI Automation & Agent Workflows – n8n / OpenClaw

2026

- Built workflow automations using n8n to process incoming data, apply conditional logic, and generate automated responses based on defined inputs and priorities.
- Worked with webhook-based automation and REST API integrations to connect external requests with AI-powered workflow logic.
- Configured and experimented with OpenClaw as an AI-agent environment, integrating LLM models and working with configurable model routing and aliases.
- Containerized local services using Docker and Docker Compose and managed development environments in Linux.
- Technologies: n8n, OpenClaw, LLMs, REST APIs, Docker, Docker Compose, Linux*

FoodVision – AI-Powered Food Recognition Web App

2024

- Integrated AI-based food recognition APIs into a React web application to automate food identification and nutritional analysis from user-submitted images.
- Evaluated API outputs across varied and ambiguous inputs and improved application-side handling of inconsistent responses.
- Built REST API integration and frontend logic for presenting AI-generated nutritional information to users.
- Technologies: React, JavaScript, REST APIs*

EDUCATION

College of Engineering Chengannur
B.Tech in Computer Science and Engineering

- CGPA: 7.53
- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Management Systems

Kerala
2022 – June 2026 (Expected)

CERTIFICATIONS

The Joy of Computing using Python – NPTEL (IIT Madras)

- Elite certification (79%) covering Python programming, computational thinking, and problem-solving.

2025

Data Structures and Algorithms Training – IIT Bombay (Mood Indigo) × Corizo

- Training in algorithmic problem-solving, data structures, complexity analysis, and structured computational thinking.

2025

ADDITIONAL INFORMATION

Languages: English (Professional), Malayalam (Native)
Cloud / Infrastructure: AWS EC2, Docker, Docker Compose, Linux
Currently Learning: Terraform, Kubernetes, advanced AI-agent workflows
Availability: Immediately available for full-time roles in Kerala / India
Interests: AI/ML engineering, LLM applications, AI agents, workflow automation, cloud technologies, and knowledge sharing
